

" Next Generation IP Camera Solution Comes with Latest H.264 Compression Technology
Featuring Increased Bandwidth(Transmission Speed) and Storage Savings "

Model: KC-9602-42S

H.264 video compression ideal for Internet streaming
1/3" 420/500/520TVL SONY Supper HAD CCD
Support SD™ Card for image capture storage
Built-in motion detection with alarm triggering output
Flexible installation to meet special needs
Two-way audio transmission
Remote monitoring through internet by powerful software
Up to 10 viewers can directly access the camera simultaneously

Kocchi's(www.kocchis.com) new released *H.264 Compression IP Dome Camera System* which might benefit your business with its new and unique feature.

Why H.264 compression technology?

The new industry standard **H.264 compression technology** is taking a revolution in the video world, enabling higher quality, lower bit rates, lower system cost and new applications. New H.264 system provides the same low-latency video that has been delivered by traditional MPEG-4 based systems but with a reduction of up to **50%** in bandwidth and storage requirement – or to put it another way, H.264 system can deliver significantly higher video quality for the same bandwidth – to save your internet resource(or higher transmission speed) and hard disk place also. With unique high resolution pixels technology and true color imaging system, the Kocchi's IP cameras attain a resolution that is three times as high as on analog video systems that are commonly using CIF format.

SD™ Card storage ready!

The new system is SD™ Card storage ready for easy recording and saving images, with the SD card slot, a convenience store owner or smaller retailer can have an all-in-one recording solution by purchasing an SD card and record on motion activity at the camera. After an incident, simply take out the SD card and play it back on a computer to view captured video.

If you'd like to have more information on this new system, please feel free to contact us by email at sales@kanecomputing.com or give us a call, on 01606 351006.
