

## 'BoostEdge' Web Traffic Accelerator at Info Security

Kane Computing was recently appointed by ActivNetworks to sell and promote their

*BoostEdge* Web Traffic Acceleration System in the UK.

*BoostEdge* is a high reliability platform that is deployed in data centres to improve speed, availability and security of web applications, where fast reliable data communications is vital. Large multi-site companies using ORACLE or Hyperion for example would benefit from this easy to install, completely unobtrusive product. ActivNetworks, expert in the **acceleration and the optimization of http/s web traffic**, will exhibit at **InfoSecurity** in London from 19<sup>th</sup> to 21<sup>st</sup> of April.

With *BoostEdge*, **your Web applications are 3 to 10 times faster**. It is ideal for enterprises of all sizes that have slow web applications issues. *BoostEdge* also ensures **servers and data security** with an SSL offload module and a comprehensive web application firewall (WAF).

*BoostEdge* Enterprise Edition key benefits :

- ✓ **3 to 10 times faster Web Response time**
- ✓ **50% to 75% less data traffic**
- ✓ Comprehensive **server and data protection**

Atos Origin, CGG Veritas, Henkel, Nielsen, Ipsos, Rio Tinto, Lafarge, Alcatel Lucent, Bouygues Telecom, Pernod Ricard, Club Med, Alstom and many others... are using *BoostEdge* to BOOST the performance of their Web applications. Visit **ActivNetworks at InfoSecurity on Booth H83B** and see how you can increase your users productivity and ease your migration to Cloud Computing by accelerating and securing your Web applications.

To arrange a **meeting**, please e-mail [sales@kanecomputing.com](mailto:sales@kanecomputing.com) with your preferred time slot.

**Get your invitation pass [here](#).**
