

PRESS RELEASE

Date : 15 December 2009

Bfi OPTiLAS announce the release of Avigilon's latest Panoramic Dome Camera

Avigilon has built a reputation as a leader in the surveillance market offering an end to end high definition CCTV solution with cameras from 1 to 16 mega pixels, network infrastructure, software and servers with a four hour on site response.

Bfi OPTiLAS' specialist Imaging Division works closely with Avigilon and was delighted with the announcement of the release of their latest panoramic dome cameras.

These new panoramic domes come in two configurations, a 180 degree and 360 degree. Each dome uses four x 2 mega pixel camera modules with either 45 or 90 degree coverage. The use of four camera modules provides much higher pixel coverage than a fisheye alternative whilst still offering exceptional value.

The cameras can be installed internally or externally depending on user requirements and mount options. They are ideal for offices, lobbies, supermarket aisles, retail and other locations requiring a high level of pixel coverage with fewer cameras.

These vandal resistant domes are consistent with Avigilon's high performance end to end HD solution. They work seamlessly within their latest open platform software using just one software channel licence.

Further support for audio, alarm in/out and POE help maintain an easy to install and versatile solution.

Please contact Dave Small from Bfi OPTiLAS on 07917 702651 or david.small@bfioptilas.com for further information.

About Bfi OPTiLAS

BFi OPTiLAS is a pan-European technical distributor of specialist products and services, including design-engineering support, to the electronics and photonics markets. BFi OPTiLAS focuses on niche technology products such as lasers, magnetic, sensors, connectors, electro-optics, imaging, communications, fibre optics, RF & microwave and other specialty components, systems, assemblies and metals. Some 300 sales engineers and other staff are employed at 10 offices throughout Europe. Official Avigilon UK stockist.

About Avigilon

The performance and value leader in high definition and megapixel video surveillance systems, Avigilon was honoured by Frost & Sullivan with the 2009 Best Practices Award as the HD Surveillance Company of the Year. Avigilon's HD surveillance systems offer a breakthrough in imaging performance, which is required for the protection of the public, critical assets, and infrastructure. Avigilon's exceptionally strong commitment to research and development ensures that it will continue to be the leader in supplying high definition surveillance systems on which demanding security professionals rely.
