

HIKVISION Releases 5-Megapixel Network Camera at Intersec 2010

January, 2010 Hikvision Digital Technology Co., Ltd., the leading supplier of digital video surveillance products, will release its next exciting surveillance product, the DS-2CD886MF-E 5-Megapixel Network Camera – at Intersec 2010, this Jan. 17th to 19th in Dubai, UAE.

Using the latest H.264 video codec based on TI's high performance DaVinci™ platform, the Hikvision DS-2CD886MF-E 5-Megapixel Network Camera delivers exquisite compressed video stream with resolution of up to QSXGA (2560x1920) at 8fps and HD 1080P (1920x1080) at full frame rate, while supporting HDMI for high-definition video display up to 1080P resolution.

With 1/2.5" progressive scan CMOS image sensor, the DS-2CD886MF-E 5-Megapixel Network Camera is able to capture minute image detail and can offer a high-definition panoramic view of moving objects in the shortest time. Local card storage (SD/SDHC) is also supported for non-stop recording even when the network connection is interrupted.

In addition, the DS-2CD886MF-E 5-Megapixel Network Camera has advanced auto iris, allowing it to perform in various lighting conditions by selecting the optimal iris position automatically. With the ICR filter auto switch and electronic shutter control, the product offers crystal clear images in low-light scenarios.

The DS-2CD886MF-E 5-Megapixel Network Camera also supports *Power over Ethernet*, two-way audio and e-PTZ, making the product an ideal solution for securing areas where clear images and great image detail are required, such as airports, passport controls, casinos and financial institutions, etc.

As well as this new high-definition network camera, visitors can see Hikvision's other industry-leading surveillance products at Intersec 2010, such as the DS-2CD876MF-E 2-Megapixel CCD-based Network Camera, the DS-2DF1-671 1.3-Megapixel Network Speed Dome and the DS-8100 Series Network DVR and DS-7300 Series Network DVR.
