“Innovative” products from Kane Computing Ltd

Kane Computing Ltd (KCL) has signed a distributor agreement with Innovative Integration to sell their DSP, Data Acquisition and FPGA real-time solutions in the UK.

Since 1988, Innovative Solutions has been delivering a rich mix of advanced data acquisition, signal processing and embedded systems off the shelf. These board level products integrate the best analogue I/O and reconfigurable FPGAs to provide cost effective solutions for challenging applications.

“I am very pleased to have been selected by Innovative Integration to work with them in the UK”, said Richard White, Managing Director of KCL. “Their product range matches perfectly with our technology expertise in data acquisition, and DSP/FPGA processing and our customer base in wireless, industrial control, test and measurement and research and development”.

Board products are available in a number of standard form factors including Compact PCI (3U and 6U), PCI Express and PCI with DSP and FPGA processing and an extensive range of I/O capability including PMC/XMC and OMNIBUS modules. Adaptors are also available, i.e. XMC to PCI Express to provide even greater flexibility.

In addition to the board level products Innovative Integration manufacture a range of intelligent embedded instruments (eInstruments) using Windows or Linux integrated with XMC I/O modules and connected to a host PC via an ultra-fast cabled-PCI carrier.

The Solomente series of standalone computers combine Celeron processors, floating point DSPs plus FPGAs combined with OMNIBUS I/O modules to provide powerful embedded data acquisition and processing solutions.

The Andale Data Logger compliments the multitude of analogue and digital XMC modules to provide up to 8 TB of hard disk array supporting data flow rates up to 1000 MB/S, sustained.

“Innovative” products from Kane Computing Ltd

For high end applications, i.e. multiple ADCs at 100MSP for RADAR or 24-bit 192KHz ADCs for audio/acoustic processing, the Matador range can provide the answer.

Innovative Integration have not forgotten support software and provide a wide range of tools and libraries both DSP side and host side plus Framework logic to support VHDL and Matlab/Simulink programming and a range of Windows IP cores for Software Defined Radio (SDR)

About Kane Computing

KCL (www.kanecomputing.co.uk) is the UK Distributor for ATEME and has been providing Image Processing, DSP and high performance computing products for use in industry, education and research since 1987. KCL has extensive knowledge and experience of providing video compression solutions for many industries particularly for digital video security and high quality broadcast applications. KCL has a policy of continual improvement and operates its business in accordance with the requirements of ISO9001:2000. KCL is also approved under the Investors in People programme.

About Innovative Integration

Since 1988, Innovative Integration (www.innovative-dsp.com) has grown to become one of the world's leading providers of DSP, Data Acquisition and FPGA solutions. Innovative offers a product portfolio unrivalled in its depth, ease of deployment and performance/price value. Innovative Integration provides board-level hardware products that integrate the best analogue I/O and reconfigurable FPGAs to provide cost-effective solutions for challenging data acquisition and signal processing applications.
