

OMAP and WinCE Products from Kane Computing

Cheshire, November 2008. Kane Computing Ltd (KCL) announced the signing of a new exclusive Channel Partner Agreement with Mistral Solutions to promote the sale of their OMAP EVMs and Processor Boards plus their 'Accelerator' family of WinCE Board Support Packages.

Development platforms include an OMAP3 EVM based on Texas Instruments OMAP35x processor with Cortex A8RISC Core and an OMAP2 EVM with Texas Instruments OMAP2530 processor plus processor boards based on the EVM.

Accelerator software for WinCE is available for TI's DaVinci DM644x Evaluation Board (DVEVM) and for TI's OMAP5912 Starter Kit (OSK).

The Mistral OMAP3 EVM with Accelerator for DaVinci WinCE fit perfectly in to our range of Texas Instrument's development tools" said Richard White, Managing Director of KCL.

Mistral offers developers low-cost and easy-to-use development platforms to leverage the capabilities of leading DSPs. Their development platforms help developers prototype and test their application well before their hardware is ready, giving them an edge over development costs and time in bringing out feature-rich wireless/multimedia devices in the market.

Mistral's powerful development platforms aid developers building next generation devices such as biometric devices, feature phones, smart phones, PDA's, gaming devices, VoIP terminals, video conferencing, security devices and portable medical devices to accelerate their product development.

Mistral's software development team has extensive experience in building Board Support Packages (BSPs) and device drivers for leading DSPs. Mistral offers a host of drivers and BSPs under the name 'Accelerator' for various DSP and OS platforms, giving engineers a quick start on their DSP based development.

About Mistral

Mistral (www.mistralsolutions.com) is a CMMi Level 3, ISO9001:2000 certified premier product realisation company providing end-to-end services for product design and development in the embedded space. They offer expert design and development services covering hardware and software, customisable product designs and IPs, System Integration and COTS Solutions that improve quality and accelerate time-to-market for a broad range of embedded systems. Mistral's expert design and development services and strategic partnerships with leading technology companies help Mistral offer a comprehensive package of end-to-end services ranging from front-end consulting and planning to developing, integrating and managing technology solutions. Mistral Solutions is a broad market OMAP Technology Centre (OTC) offering services in the area of software and hardware design, development and consulting on the OMAP™ platform.

About Kane Computing Ltd.

KCL (www.kanecomputing.co.uk) has been providing Image Processing, DSP and high performance computing products for use in industry, education and research since 1987. KCL has extensive knowledge and experience of providing video compression solutions for many industries particularly for digital video security and high quality broadcast applications. KCL has a policy of continual improvement and operates its business in accordance with the requirements of ISO9001:2000. KCL is also approved under the Investors in People programme.
