

NexVision comes to the UK

Cheshire, England, December 2008. Kane Computing Ltd (KCL) have signed an agreement with NexVision, based in Marseille, France, to work as a Value Added Reseller in the UK.

NexVision specialise in video related applications based on Texas Instruments DaVinci Technology including remote video monitoring, video security, infotainment, digital signage, defence, automotive and industrial inspection.

They can provide reference designs with hardware/software licensing or complete turnkey systems to speed up product development. Products include CAMHD an HD network camera reference design based on the DaVinci DM6467 processor and FPGA front end. Related products include NexRMC, NexVision Remote Media Centre Software, which supports CAMHD specific features like K-HDTM resolution, sensor monitoring, firewall pass through recorded video search and intuitive user configurable interface.

To compliment NexRMC, NEXSTREAM Server and NEXSTREAM Client are professional real-time streaming servers that comply fully with RTP/RTCP/RTSP standards to support 24/7 end to end transmission of real-time data and includes full RTP stacks, RTCP stack and RTSP session management stack.

NexNVR, a megapixel Network Video Recorder provides the final product to create a complete network video security and remote control system.

About NexVision

Founded on August, 2002, NexVision is 100% Private Capital funded. NEXVISION has a singular focus on network electronic design systems for the security market. They devote all their resources towards providing innovative hardware and software solutions in the field of Video-Over-IP for the security market. Their team develop a deep expertise in remote control & video observation end application domains. Their mission is to provide turnkey systems to large CCTV manufacturer. Their business model : license for complete or subpart of our hardware and software platform designs.

About Kane Computing Ltd.

KCL (www.kanecomputing.co.uk) is a Texas Instruments Third Party Partner specialising in consultancy and advice on TI development tools/platforms and image processing applications. KCL offer the widest range of Texas Instruments DSP based hardware platforms, software libraries and tools in the UK as a result of their close relationship with TI and a range of other TI 3rd Parties. Based on 18 years of experience KCL understand what developers need and have the knowledge and resources to provide the correct solutions. KCL has a policy of continual improvement and operates its business in accordance with the requirements of ISO9001:2000.
