

SmartVue Award Winning All-in-One Professional Network Video Surveillance Solution

December 1st, Cheshire, UK. Kane Computing announced the UK launch of the SmartVue® S9 a revolutionary all-in-one wireless network video surveillance solution that supports Windows® and Apple® computers as well as most mobile platforms including iPhone®, iPad, Android and Blackberry®.

Award-winning Smartvue S9 servers support up to 64 network cameras and are available with 1TB or 2TB of storage. They include integrated 802.11n/b/g/a wireless as well as gigabit Ethernet for wired and wireless cameras, including those from Axis™ Communications. S9 comes with a free peer-to-peer remote video management service called InsightServer™ that supports thousands of cameras through a single web interface on Apple or Windows. Smartvue S9 also includes free remote surveillance apps for iPhone, iPad, and Android.

Smartvue S9 won the 2010 Mobility Award for Mobile Video Surveillance. The Mobility Awards honor the best and finest mobile computing and wireless data communications products and services.

"Smartvue S9 is an elegant video surveillance solution in a sleek and compact design," said Martin Renkis, Smartvue's founder and CEO. "S9 makes professional surveillance easy to implement, quick to scale, and simple to use for one to one million locations. It fulfills the needs for multiple location enterprises, small to mid-sized businesses, and the high-end residential market."

"S9 is one of the very best ways for people to monitor what's important to them," said Joseph Barnes, Smartvue's CTO. "S9 makes the most advanced wireless surveillance technologies simple to use for monitoring one to one million locations, in ways that other surveillance solutions just can't do."

About Smartvue Corporation

Smartvue Corporation (www.smartvue.com) has been one of the leading innovators in the wireless network video industry since 1996. The company commercialized the world's first wireless network video recorder, 802.11N network camera, H.264 in camera video compression, and self configuring network video platform. The company has published more than two dozen patents and continues its heritage of innovation with Smartvue S8.
