

Video Surveillance Solutions

Video surveillance cameras are now so numerous, they are regarded as part of our normal lives, however a camera is useless if it does not provide good quality images that can be easily transmitted, stored and retrieved. This is best done in the digital domain using the very latest Video over IP and video compression technology.

ATEME is a world leader in MPEG-4 AVC/H.264 video compression technology and Video over IP. They established their leadership in MPEG-4/H.264 technology in the UK with customers such as Group 4 and British Telecom. One of the many advantages of our products is that they are fully ISO compliant ensuring interoperability with standard PC players, video walls, etc.

ATEME have also been successful in France with their video compression/streaming products, including the supply of 600 encoders for the A86 motorway tunnel.

ATEME delivers a full range of products specifically developed to fully meet the needs of the video security market, including:

- 4-channel IP video encoders with internal recording and an innovative architecture based on two processors
- Compact H.264 / MPEG-4 IP video encoders, transmitting any analog video source over IP networks at low bitrates
- Compact H.264 / MPEG-4 IP video decoders, ensuring excellent image quality at high and low frame rates
- Network Video Recorder software (NVR)

These modules provide best in class video quality combined with ease of use and are completely interoperable.

ATEME's video surveillance product range mainly targets the following end users:

- Motorways, tunnels
- Transportation (bus, trains, tramways ...)
- Military applications (drones, tanks ...)
- Public safety

Due to its flexible approach,

ATEME is also capable of developing solutions to meet the needs of other types of customers.
